

# K&K'S KITCHEN STORAGE BASKET

Dimensions: Base 10"x10", 9"H, 14"Diameter at rim

## MATERIALS:

Spokes: 5/8" FF, cut 40 @ 12"  
Weavers: #2 RR natural  
Slab cane (8-10MM width)  
Rim: 5/8" FO  
Seagrass as rim filler  
3/8" FF as hidden rim row  
Medium cane as lasher  
Base: 10" slotted square

## PREP:

Stain the base, spokes and rim material a color you desire.  
Let dry before inserting spokes.

## BASE:

Insert a spoke in each corner and 9 spokes on each side. Glue into position if desired. With #2 RR, twine 2 rows. Bend up.

## SIDES:

The basket has a slight flare so expand the sides until you reach a 14" diameter.

Rows 1-27: Slab cane, O1U1. Slab cane can be very sharp/cutting so pull it through a Scotch Brite Heavy Duty scrub sponge. The green scrubby side will help smooth out rough areas and remove loose fibers.

Row 28: 3/8" FF as hidden rim row

Pack. Cut and tuck.

## RIM:

Use 5/8" FO for the inside and outside rims. You may have to touch-up the scarfed areas with your selected stain. Seagrass is the rim filler. Lash with medium cane.

## NOTE:

I pre-stained the spokes, rim, and base because I did not want any color on the slab cane. The people who requested this basket wanted distinctive light and dark colors.
